**LOCATION:** Miami, FL, USA

**ORG SIZE:** More than 100 employees

**MICROSOFT AZURE PARTNER PROFILE:**

AuraPortal is one of the fastest zero-code solutions for building and running business applications and processes that automate, monitor, control, and optimize all business activities. The agile, easy-to-use platform boasts quick implementation and increased customer satisfaction.

# Zero-Code Solution on Azure Helps Businesses Optimize Processes with Automation and Agility

**“Implementing Azure has empowered us to help our customers enable digital transformation. The secure and easy-to-use cloud platform and AuraPortal’s intelligent business process management suite is a winning combination.” – Ilian Radoytsov, Innovation Director, AuraPortal**

- **SITUATION**

AuraPortal’s mission to help companies transform and succeed in the digital area required a cloud platform that was powerful enough to support its global activity and provide the mobility its customers demanded. AuraPortal needed a trusted cloud service provider with advanced security features, comprehensive compliance coverage, and a highly available global network.

- **SOLUTION**

AuraPortal chose Microsoft Azure because it safeguards customer assets through a rigorous methodology and focus on security, privacy, compliance, and transparency. This enables AuraPortal to meet its customer compliance requirements while delivering optimal flexibility and faster innovation. AuraPortal Cloud benefits from Azure Infrastructure-as-a-Service, virtual machines, Cloud Services, Azure virtual network, Load Balancer, VPN Gateway, Storage, network infrastructure, and Azure SQL Database.

- **BENEFITS**

Microsoft Azure gives AuraPortal the freedom and agility to build, deploy, modify, and optimize business processes on the fly.

Azure integrates data from multiple sources – including ERP and CRM systems and the web – to provide real-time actionable insights.
